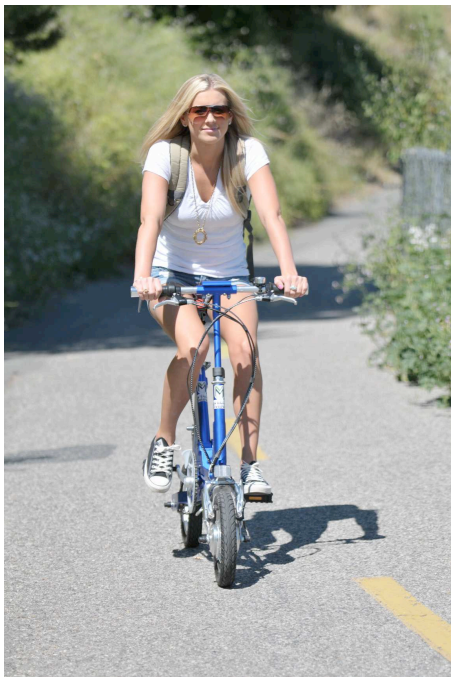
VeloMini Introduces the VeloMini III

3 Speed Folding Electric Bicycle

For Immediate Release -



San Francisco, CA – Full size bikes are great for exercise and recreation near home but when it comes to travel or combining bikes with mass transit, RV, the trunk of a car or private plane, lightweight folding electric bikes are your best bet. The VeloMini is the most compact and lightweight folding electric bike. Ride, carry and park the VeloMini anywhere, where the rest won't.

Most electric folding bicycles are heavy, 50+ pounds, and extremely hard to fold and carry. The new VeloMini III overcomes all of these issues. Even with the new Shimano internal 3 speed in the rear hub, the 180 watt motor in the front hub, and the 24 volt, 9 ah battery in the frame, the VeloMini weighs less than 34 lbs.

The new VeloMini III offers throttle as well as pedal assist. With throttle mode only, the range with the new 9 ah battery is up to 12 miles. With pedal assist the range can be greatly extended. First gear makes it easy to assist the motor when traveling up hill or from a dead stop and third gear allows the pedals to keep up with the motor when traveling at the top speed of 12 miles an hour.

With a little practice the VeloMini can be folded and unfolded in less than 20 seconds. When folded the VeloMini III can be wheeled, (holding the bike by the seat and using the front wheel to steer) carried using the supplied carry strap, or placed in the carry case which converts to a back pack when not being used.

The VeloMini III folds to 18 inches tall and is small enough to bring into a hotel room, office, or dorm to charge it and protect it from theft. The VeloMini III as well as the original VeloMini 1 speed are available in: Brushed Silver, Black, Blue and Red.

Combine the VeloMini with the new T-1 luggage/bike trailer and you are ready to travel the world. The T-1 converts in seconds from a bike trailer to luggage with wheels. Like the VeloMini, the T-1 bike trailer comes with a carrying case to protect it in transit. VeloMini and T-1 are small, light weight, stylish, versatile, convenient, and durable. VeloMini and T-1 fold so small you can take them practically everywhere.

VeloMini III Electric Folding Bicycle: $1195 with case, strap, tool kit and charger.

T-1 Luggage/bike trailer: $319 with case, bike connector, and flag.
